

Ian D. Roberts

Post-doctoral Research Associate, Leiden Observatory, 2020-present
iroberts@strw.leidenuniv.nl

galaxy evolution • galaxy groups and clusters • star formation quenching • multiwavelength

Education:

PhD, McMaster University, Hamilton ON, Canada

Thesis: Galaxy Clusters and Their Role in Galaxy Evolution (with Laura Parker)
2016-2020

MSc, McMaster University, Hamilton ON, Canada

Thesis: Galaxy Properties Across Diverse Halo Environments (with Laura Parker)
2014-2016

BSc, Mount Allison University, Sackville NB, Canada

Thesis: Simulation of Double-Peaked Meteor Light Curves (with Bob Hawkes)
2010-2014

Teaching:

Head teaching assistant, Introductory Physics, McMaster University, 2015-2020

Teaching assistant, McMaster University, 2014-2016

Courses including: Electricity and Magnetic Fields, Big Questions in Astronomy, Introductory Mechanics

Teaching assistant, Mount Allison University, 2011-2014

Courses including: General Physics, Solar System Astronomy, Stars Galaxies and the Universe

Research Supervision:

- Federica Mauro (Masters), *SED Fitting in Coma Cluster Jellyfish Galaxies*, Leiden Observatory, 2021
- Maojin Lang (Masters), *Resolved Star Formation in Jellyfish Galaxies*, Leiden Observatory, 2021
- Shaojin Huang (Bachelors), *Galaxy Properties Between Close Cluster Pairs*, McMaster University, 2019

Outreach and Service:

- Coordinator of the PhD Colloquia, Leiden Observatory, 2021-present
- Member of Astronomy on Tap Leiden, 2021-present
- Referee for Monthly Notices of the Royal Astronomical Society
- Manager of the William J McCallion Planetarium, 2016-2020
- Member of McMaster Sidewalk Astronomy, 2015-2020
- Presenter at William J McCallion Planetarium, 2014-2020

Scholarships & Awards:

- Ontario Graduate Scholarship (Doctoral), \$15000
- Dawes Memorial Fellowship for Graduate Studies in Physics, \$2000
- NSERC Post Graduate Scholarship (Doctoral), \$105000 over 3yr
- Ontario Graduate Scholarship (Masters), \$15000
- NSERC Post Graduate Scholarship (Masters), \$17500
- Marjorie Young Bell Summer Research Grant, \$6250
- Mount Allison University Entrance Scholarship, \$32000 over 4yr

Colloquia & Seminars:

- Leiden Observatory, *Fishing for Jellyfish: The Evolution of Galaxies in Dense Environments*, 2020
- McMaster University, *Quenching Low Mass Galaxies: Evidence for a Threshold ICM Density*, 2019
- Université de Montréal, *The Dependence of Galaxy Properties on Group Dynamical State*, 2017

Observing Programs:

CO-I - Brown T., et al. (**Roberts I.D.**, co-I), ALMA Cycle 7, 2019.1.00763.L, Large Program, ~200 hr, *VERTICO: The Virgo Environment Traced in CO*.

PI - **Roberts I.D.**, Parker L.C., Hlavacek-Larrondo J., Edwards L.O.V., Gemini semester 2019A, GN-2019A-Q-311, 18.0 hr, *Mapping central emission in cool-core groups*.

PI - **Roberts I.D.**, Parker L.C., Hlavacek-Larrondo J., Edwards L.O.V., Gemini semester 2018A, GN-2018A-Q-211, 13.5 hr, *Mapping central emission in cool-core groups*.

Refereed Publications:

7 papers as first author, 9 papers total, h-index: 7

9. **Roberts I.D.**, Parker L.C., *Ram pressure candidates in the Coma Cluster: Evidence for enhanced star formation*, 2020, MNRAS, 495, 554.

8. **Roberts I.D.**, Parker L.C., “*Observing*” *unrelaxed clusters in dark matter simulations*, 2019, MNRAS, 490, 773.

7. Demers M.L., Parker L.C., **Roberts I.D.**, *Smaller stellar disc scale lengths in rich environments*, 2019, MNRAS, 489, 2216.

6. **Roberts I.D.**, Parker L.C., Brown T., Joshi G.D., Hlavacek-Larrondo J., Wadsley J., *Quenching low-mass satellite galaxies: evidence for a threshold ICM density*, 2019, ApJ, 873, 42.

5. Evans, F.A., Parker L.C., **Roberts I.D.**, *Red Misfits in the Sloan Digital Sky Survey: Properties of Star-Forming Red Galaxies*, 2018, MNRAS, 476, 5284.

4. **Roberts I.D.**, Parker L.C., Hlavacek-Larrondo J., *Connecting optical and X-ray tracers of galaxy cluster relaxation*, 2018, MNRAS, 475, 4704.

3. **Roberts I.D.**, Parker L.C., *Evidence of pre-processing and a dependence on dynamical state for low-mass satellite galaxies*, 2017, MNRAS, 467, 3268.

2. **Roberts I.D.**, Parker L.C., Karunakaran A., *Comparing galaxy morphology and star-formation properties in X-ray bright and faint groups and clusters*, 2016, MNRAS, 455, 3628.

1. **Roberts I.D.**, Parker L.C., Joshi G.D., Evans F.A., *Mass segregation trends in SDSS galaxy groups*, 2015, MNRAS, 448, L1.

In Proceedings:

1. **Roberts I.D.**, Hawkes R.L., Weryk R.J., Campbell-Brown M.D., Brown P.G., Stokan E., Subasinghe D., *Meteoroid structure and ablation implications from multiple maxima meteor light curves*, 2014, Proceedings of the Meteoroids Conference, ed: Jopek T.J., Rietmeijer F., Watanabe J., Williams I.P., 155

Contributed Talks:

Linking star formation quenching and ICM density, 2020, Quenching and Transformation Throughout Cosmic Time, Aspen, United States.

Quenching low-mass satellite galaxies: evidence for a threshold ICM density, 2020, Meeting of the American Astronomical Society, Honolulu, United States.

Quenching low-mass satellite galaxies: evidence for a threshold ICM density, 2019, Meeting of the Canadian Astronomical Society, Montreal, Canada.

Insights into cluster relaxation and galaxy quenching from X-ray obs. (at low-z), 2018, GOGREEN collaboration meeting, Waterloo, Canada.

Connecting optical and X-ray tracers of galaxy cluster relaxation, 2018, Glenfiddling Galaxy Clusters workshop, Edinburgh, Scotland.

A product of their Halo Environment: How galaxy properties depend on group X-ray luminosity and dynamical state, 2016, Annual Meeting of the Canadian Astronomical Society, Winnipeg, Canada.

Implications for meteoroid structure and ablation from multiple maxima meteor light curves, 2013, International Meteor Conference, Poznan, Poland.

Contributed Posters:

Quenching low-mass satellite galaxies: evidence for a threshold ICM density, 2018, Meeting of the Canadian Astronomical Society, Victoria, Canada.

The dependence of galaxy properties on group X-ray luminosity and dynamics, 2017, Galaxy Evolution Across Time, Paris, France.

How galaxy properties depend on group X-ray luminosity and dynamical state, 2016, CAASTRO: The Changing Face of Galaxies, Hobart, Tasmania AUS.

How galaxy properties depend on group X-ray luminosity and dynamical state, 2016, Great Lakes Cosmology Workshop, Hamilton, Canada.

Effects of X-ray luminosity on galaxy star formation and morphology in SDSS groups and clusters, 2015, Meeting of the Canadian Astronomical Society, Hamilton, Canada.

Mass-segregation trends in SDSS galaxy groups, 2015, Meeting of the Canadian Astronomical Society, Hamilton, Canada.

Laser Ablation Techniques for Simulation of Hypervelocity Impact on Materials Relevant to the Space Industry, 2012, IRM 10th Anniversary Symposium, The Future of Materials Research, Halifax, Canada.
